## 4 First aid measures

· Description of first aid measures

- · General information Instantly remove any clothing soiled by the product.
- $\cdot$  After inhalation Take affected persons into the open air and position comfortably
- After skin contact Instantly wash with water and soap and rinse thoroughly. If skin irritation persist, call a physician.
- After eye contact Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.
- · After swallowing

Rinse out mouth and then drink plenty of water.

- Seek immediate medical advice.
- · Information for doctor
- · Most important symptoms and effects, both acute and delayed Allergic reactions
- Indication of any immediate medical attention and special treatment needed No further relevant information available.

## **5** Firefighting measures

## · Extinguishing media

- $\cdot$  Suitable extinguishing agents
- Water spray, carbon dioxide (CO2), carbon dioxide blanket, foam, or dry powder. Sand
- $\cdot$  For safety reasons unsuitable extinguishing agents Water with full jet.
- $\cdot$  Special hazards arising from the substance or mixture
- Can be released in case of fire
- Carbon monoxide (CO)
- Carbon dioxide (CO2) Nitrogen oxides (NOx)

Under certain fire conditions, traces of other toxic gases cannot be excluded.

## Safety data sheet according to 1907/2006/EC, Article 31

Version number 7

Revision: 23.11.2012

#### Trade name: Hilti HIT-HY150

(Contd. of page 2)

· Advice for firefighters

· Protective equipment: In the event of fire, wear self contained breathing apparatus

#### 6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures
- Wear protective equipment. Keep unprotected persons away.
- Wear protective clothing. Keep away from ignition sources
- Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition.
- Environmental precautions:
- Do not allow product to reach sewage system or water bodies.
- Do not allow to enter the ground/soil.
- Methods and material for containment and cleaning up:
- Collect mechanically.
- Clean the accident area carefully; suitable cleaners are:
- organic solvent
- Dispose of contaminated material as waste according to item 13.
- Reference to other sections
- See Section 7 for information on safe handling
- See Section 8 for information on personal protection equipment.
- See Section 13 for information on disposal.

#### 7 Handling and storage

#### · Handling

- · Precautions for safe handling
- Check the expiry date: see imprint on manifold (month/year). Do not use expired mortar!
- The usual precautionary measures should be adhered to general rules for handling chemicals.
- Keep away from heat and direct sunlight.
- Information about protection against explosions and fires: Keep ignition sources away Do not smoke.
- · Conditions for safe storage, including any incompatibilities
- · Storage
- Requirements to be met by storerooms and containers: Keep in a cool, dry and dark place; 5 °C to 25 °C.
- · Information about storage in one common storage facility: Store away from foodstuffs.
- · Further information about storage conditions: Protect from heat and direct sunlight.
- Storage class
- As per VCI (1991) storage classification concept.
- 11

· Specific end use(s) Adhesive mortar for anchor fastenings in concrete

#### 8 Exposure controls/personal protection

- · Additional information about design of technical systems: No further data; see item 7.
- · Control parameters

#### · Components with limit values that require monitoring at the workplace:

- The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.
- The product has a pasty consistency. Exposure limit values for respirable dusts ar not relevant for this product.
- · Additional information: The lists that were valid during the compilation were used as basis
- · Exposure controls
- · Personal protective equipment
- General protective and hygienic measures
- The usual precautionary measures should be adhered to general rules for handling chemicals.
- Do not inhale gases / fumes / aerosols.
- Avoid contact with the eyes and skin.
- Do not eat, drink or smoke while working
- Wash hands during breaks and at the end of the work.
- Take off immediately all contaminated clothing
- Keep away from foodstuffs, beverages and food.
- · Breathing equipment: Not required.
- · Protection of hands:
- Protective gloves
- EN 374 / EN 388

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Avoid direct contact with the chemical/ the product/ the preparation by organizational measures.

Material of gloves

Nitrile rubber, NBR

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

### Trade name: Hilti HIT-HY150

(Contd. of page 3) · Penetration time of glove material The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed. Not suitable are gloves made of the following materials: Natural rubber, NR Leather gloves Strong gloves • Eye protection: Tightly sealed safety glasses.

EN 166 / EN 170

· Body protection: Protective work clothing.

## 10 Stability and reactivity

· Reactivity · Chemical stability

- $\cdot$  Thermal decomposition / conditions to be avoided:
- To avoid thermal decomposition do not overheat.
- No decomposition if used and stored according to specifications.
- · Possibility of hazardous reactions No dangerous reactions known
- Conditions to avoid No further relevant information available.
- $\cdot$  Incompatible materials: No further relevant information available.
- · Hazardous decomposition products: No dangerous decomposition products known

## **11 Toxicological information**

- · Information on toxicological effects
- · Acute toxicity:
- · Primary irritant effect:
- · on the skin: No irritant effect.
- on the eye: No irritant effect.
- · Sensitization: Sensitization possible by skin contact. · Additional toxicological information:

The product shows the following dangers according to the calculation method of the General EC Classification Guidelines for Preparations as issued in the latest version:

Irritant

### **12 Ecological information**

- · Toxicity
- · Aquatic toxicity: No further relevant information available.
- · Persistence and degradability No further relevant information available.
- · Behaviour in environmental systems:
- · Bioaccumulative potential No further relevant information available.
- · Mobility in soil No further relevant information available.
- · Additional ecological information:
- · According to recipe contains the following heavy metals and compounds according to EC guideline NO. 76/464 EC: None
- · General notes: The product does not contain organically bounded halogens (AOX-free).
- · Results of PBT and vPvB assessment
- · PBT: Not applicable.
- · vPvB: Not applicable.
- · Other adverse effects No further relevant information available.

## **13 Disposal considerations**

#### · Waste treatment methods

#### · Recommendation

For disposal, local regulations issued by the authorities must be observed.

After curing, the product can be disposed of with household waste.

Full or only partially emptied cartridges must be disposed of as special waste in accordance with official regulations.
